

# Cybersecurity and Technology Advisory

Safer, high-performing business made possible

# Cybersecurity and Technology Advisory

Cybercrime and IP infringement incidents are costly for organisations. Direct financial losses, combined with severe business disruptions, penalties and the required resources to rectify the episode can potentially cripple a business. In addition, consequential losses, such as reputational damage and legal implications may be more severe than the incident itself.

Drawing from a deep well of experience, our Cybersecurity and Technology Advisory services team offers solutions that deliver the difference. We are able to assist you to effectively manage cybercrime incidents, detect IP infringement and to minimise business risks. We can also help to optimise the return of investment in IT spending and build stronger IT capabilities to enhance the overall business performance of the company.

## **Regulatory/Standard Compliance and Policy Review**

Is your existing business aligned to international/local requirement? We are legally trained to assist clients to review policy and framework for compliance to regulations such as:

- Data Privacy Law (PDPA, GDPR, Cybersecurity Law etc.);
- Compliance to Standards (ISO27001, NIST, OSPAR, TRM etc.) etc.

## **Information Security Assessment Control / IT Audit**

Concern that your IT infrastructure may have gaps? We have a team of trained specialists that can provide the following services:

- Vulnerability Assessment (VA);
- Penetration Testing (PT);
- Infrastructure review;
- Application review;
- System review etc.

## **Cybersecurity and Data Loss Prevention Training and Education**

Are your employees and Business Partners aware of their obligation towards compliance? We help clients to develop training material and deliver it via classroom and/or online learning. Some topics include:

- Data Loss Prevention training;
- IT Compliance training;
- Cybersecurity Awareness;
- Phishing email campaign etc.

## **Cybersecurity Advisory**

Worried that you could be the next cyber breach victim? Our team of trained specialists can provide clients:

- Consultation on Cyber Risk;
- Cybersecurity monitoring through Security Operations Center (SOC);
- Cybersecurity Product Sales etc.

## **Cyber Incident Response and Forensics Investigation**

There is a breach! Our team of specialists will respond to your needs in the shortest possible time and render support in area of:

- Data Recovery and Hard-disk repair;
- Vulnerability Fix;
